

How to move Google Chrome bookmarks to a new computer.

1. On the computer that contains your bookmarks, open Google Chrome.
2. Click the settings button at the top right of the window.
3. Click "Bookmarks."
4. Click "Bookmark manager."
5. In the Bookmark Manager Click the "Organize" button at the top left of the window.
6. Click "Export bookmarks to HTML file..."
7. Navigate to your desired location and click "Save." (A flash drive is a good choice to move favorites to a new computer.)
8. On the new computer follow steps 1-5 above.
9. Click "Import bookmarks from HTML file..."
10. Browse to the location of the saved bookmarks from the old computer.
11. Select the correct file and click "Open." This will save the bookmarks to your new computer.
