

How to setup Google Chrome to sync with other computers

Google Chrome will allow you to sync your bookmarks and other settings with multiple computers and devices using Google Chrome. To use this function you will need a Google account. If you do not have a Google account setup, you can setup a new account at Google.com.

1. On your computer open Google Chrome.
2. Click the settings button at the top right of the screen.
3. Click "Settings."
4. Click "Sign in to Chrome."
5. Enter your Google account information then click "Sign in."
6. A. If you are alright with the default settings click "OK, sync everything." Or click "Advanced" to make modifications to the items that Chrome will sync.

7. On other computers and devices follow instructions 1-6.

Your Google Chrome settings including bookmarks and other options will now be synced with all your devices that have Chrome installed and that you manually connected.
