

Edit Contact Information in OKEY

Making sure your contact information is up to date and correct in the OKEY system is crucial for the DASNR Directory. To check if your information is up to date, go to Okey.okstate.edu and log in with your email address and password.

Once logged in, select “Edit Contact Information” from the list on the left hand side of the screen.

*Note: The information should be your *work* information instead of personal information.

It may take a few days for the directory to display the changes you have made. Contact your Support Specialist if you have any questions or suggestions.
