

How to save YouTube videos for playback when not connected to the internet

1. Navigate to the video on YouTube that you would like to save. (If the video is not on YouTube click the YouTube button in the corner of the video.)
2. Copy the URL (the YouTube website) of the video.
3. Navigate to Keepvid.com
4. Paste the URL into the link field of the keepvid website (shown below as "1").
5. Click the download button at the end of the link field (shown below as "2"). Do not use the button with the X.

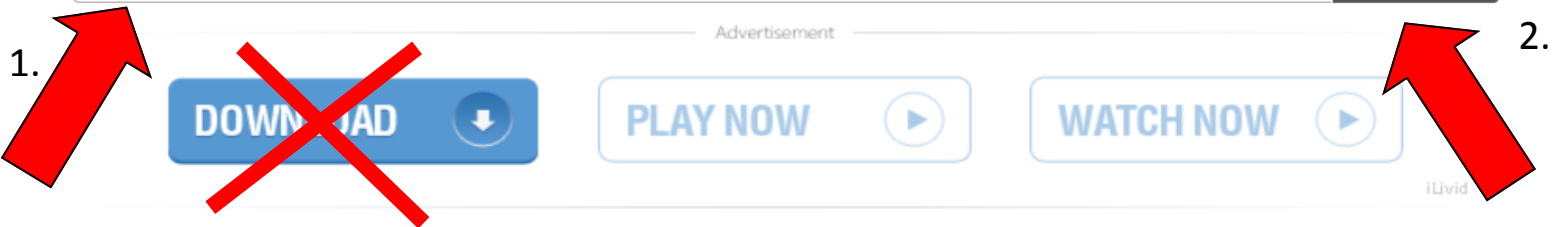

KEEPVID
download streaming videos

KEEPVID Bookmarklet
1.) Drag this button onto your links toolbar
2.) Click **Keep It!** when watching a video to download it

enter the link of the video you want to download: e.g <http://vimeo.com/47337258>

DOWNLOAD

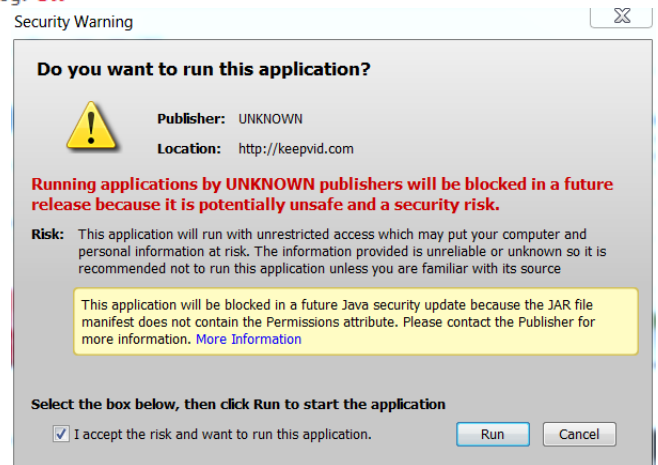

6. When the Java Security Warning windows pops up, click the I accept field and then click Run.

7. The website will now show several versions available for you to download. You will want to download one with the highest video display resolution (in most cases what will be 480p).

8. Click the link beside the video resolution (shown below in multiple colors as "3").

9. Click Save or Save As to save it to your computer.

I would highly recommend testing the video out before any presentation. You may have to try several different video resolutions to find one that works correctly.

Please report any issues to: contact@keepvid.com
